**15%**  
average year 1  
PMPM reduction

**88%**  
physician  
engagement rate

**94.1%**  
medication  
adherence rate

**99.4%**  
client  
retention rate

## How We Put You First

### Clinically-Driven

EmpiRx Health puts the pharmacist at the center of the pharmacy care service model. This ensures the most clinically-appropriate and coordinated care which improves outcomes.

### Customer-First

We always put the needs and interests of our customers and members first. EmpiRx Health is singularly focused on delivering the strongest financial results for customers while optimizing member health and wellbeing.

### Value-Based

Unlike the traditional PBM model that maximizes drug rebates at the expense of customers, EmpiRx Health prioritizes value over volume shifting the drug mix to ensure care, reduce cost, and sustainable prescription drug trend.

### Innovation-Powered

Our clinical pharmacists leverage exclusive population health analytics and AI-powered technologies to make evidence-based medication therapy recommendations. The results: Better health outcomes and lower drug costs.
