# **Seamless Transition of Care**

The smooth transition of care is driven by a personalized clinical strategy in tandem with deep pharmacist-physician engagement. EmpiRx Health's focus is always on *clinical appropriateness*, *health safety*, and *cost*.

# THERAPY & UTILIZATION ANALYSIS

Incumbent claims and open-refill files used to analyze existing member therapies.

# SEAMLESS MEMBER EXPERIENCE

Existing therapies remain in place via predefined transition window (~3 months)—member treatment is not disrupted.

# IDENTIFY OPPORTUNITIES

Claims data analysis identifies opportunities for therapy optimization based on clinical appropriateness and cost.

# PHYSICIAN CONSULTATION

Clinically appropriate and cost-effective options determined by pharmacists and prescribing physicians—the physician controls the pen.

# COMMUNICATION & ADVOCACY

Changes communicated to members and dispensing pharmacist. Complex cases receive proactive care from Member Care Advocates.

# ONGOING MONITORING

Members' response to new therapies monitored over a 3-month period.

Our Population Health Management model ensures a highly-tailored transition of care based on the client's specific population risk and utilization.
