

# New Clinical Subscription Model Strengthens Value and Transparency of Your Pharmacy Care

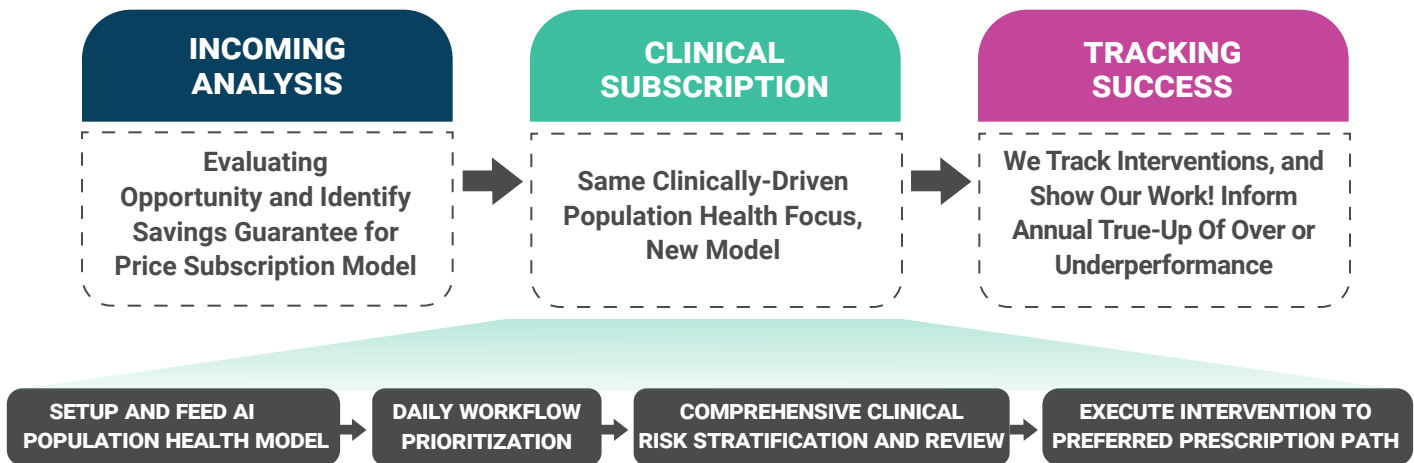

EpiRx Health is transforming pharmacy benefits management by putting the pharmacist at the center of the industry's leading clinically-driven care model. As the pioneer in value-based pharmacy care, EpiRx Health puts the needs of its customers and their members first to optimize health outcomes while substantially reducing prescription drug costs.

Consistent with its mission to make the highest quality pharmacy care more affordable, accessible, and transparent, EpiRx Health has introduced a breakthrough new Clinical Subscription Model. This unique new PBM model brings significantly

more transparency and clarity to the clinical savings that EpiRx Health guarantees to its clients.

Based on clear subscription pricing, our new Clinical Subscription Model aligns the services provided by EpiRx Health with the costs and benefits associated with those services. In fact, we are so confident of our new clinical savings model that **we guarantee a specific Return on Investment when you become an EpiRx Health client.**

## How the Clinical Subscription Model Works

## Our Goal: Make Your Clinical Savings Clear & Transparent

- Guaranteed 3:1 ROI is a straightforward 25% of savings that we charge as a flat rate per month.
- If we don't deliver, we pay you back in the sufficient amount to meet our guarantee and ROI promise. When we overdeliver, YOU benefit 3:1 on the upside.

### Here's an Example of ROI Guaranteed by Our New Clinical Subscription Model:

- Our analysis shows \$400K target savings opportunity for the year and we can guarantee \$300k savings net of fees. We will charge \$100K to initiate setup, run our systems, and staff our clinical model to deliver \$300k net savings to you.

- **If we exceed our \$400k target, we keep the \$100k and invoice for 25% of excess over \$400k. If we miss the \$400k, we pay you back to what we need to meet our guarantee and ROI promise.**
